

## EDCO provides quality online tools designed for self-training.

Our traveling staff is the best, but they can't be everywhere. We know our customers demand 24/7 learning opportunities. EDCO's online training gives everyone the power to instantly teach themselves how to maximize Return on Investment. These tools were created years before social distancing was needed.

Here are 4 ways everyone at your company can learn how to use, maintain, and profit with EDCO products. **EDCOinc.com** is our flagship site with lots of information and videos. **EDCOed.com** provides hours of profit-generating certification tracks. We've been uploading training material to **YouTube** since before it was common practice.

**QRC Decals:** Please take a moment to inspect your current EDCO equipment making sure all QRC Decals are in good shape. The decal is located on the handlebar of most models. This code allows anyone to access our online resources. It will explain to the operator the correct application and usage of that particular piece of EDCO equipment. Simply scan, and the information appears. Scan the one below to see what we mean.

We've created a QRC Decal order sheet on EDCOinc.com. Visit the homepage or this link <https://bit.ly/2vxKEfV> to order what's needed and EDCO will deliver them to you for free (as soon as we can). It's our educational gift to our customers.

Thanks,

Jason Stanczyk
